**Secondary Education**
Contai High School
*02/2016*                    *Percentage : 86.71*

## PERSONAL PROJECTS

### The Unseen ⤴
- **HTML , CSS , DJANGO , WebRTC API**
- A social networking site that allows you to video chat and hangout online is the primary inspiration for my project
- Here we can randomly select person those who are available in online.
- They can connect themselves through chat and video call.
- Github Repository ⤴

### Medimeds ⤴
- **HTML , CSS , Random Quote Generating API , WhatsApp, Twitter and Facebook share API**
- A mind peace app for bursting out daily stress, anxiety and depression using the healing power of music and meditation.
- Here we can can read motivational quotes, bed time stories etc.
- This webapp can help **264M** people in the world(**3.4%**) who are facing **depression** and **284M** people in the world(**3.8%**) who are facing **anxiety disorders**.
- Github Repository ⤴

### Gender & Age Detection
- **OPENCV , ARGPARSE**
- To build a gender and age detector that can approximately guess the gender and age of the person (face) in a picture using the audience image.
- Here we can detect the result with more than **70% accuracy.**
- Github Repository ⤴

### KQuiz ⤴
- **HTML , CSS , DJANGO**
- This is the online student exam evaluation site. Here any teacher can register .After registration admin will verify the teacher's identity .The teacher can create any kind of quiz in any subject.
- Here any student also can register and give their quiz. Also they can see their marks they got in the exam.
- Github Repository ⤴
